Abstract	KW MULTIPROG, Error message of object out of worksheet		
Keyword	MULTIPROG, LD, FBD, Error message		
Related Product	ADAM-5510KW, ADAM-5560KW, APAX-5520KW, APAX-5620KW		

■ **Description**:

This document describes how to adjust the layout of worksheet size to extend the space for program with higher complexity.

■ **Problem**:

When editing the POUs in the KW MULTIPROG, it's found that user cannot add another network of ladder or program (*Figure 1*). There's a pop-out error message indicates "object out of worksheet"

How to prevent this error message so that user may continue their program?

Figure 1

■ **Answer**

Default size of the worksheet of KWMULTIPROG is 400 X 400. Once the content in the worksheet exceeds this limitation, user can not add another line of program.

User can adjust the size of worksheet freely according to the complexity of each program.

Click the "Layout" → "Worksheet Size" to see the current worksheet size setting and modify it to an ideal value.
