Abstract	TCL sample code for reading data through barcode reader		
Keyword	WebAccess TCL Serial Barcode		
Related Product	N/A		

■ Problem Description:

TCL sample code for read the barcode reader's barcode through serial comport.

■ Brief Solution:

TCL "fconfigure" is a build-in command for setup serial port configuration.

Sample code :

```
# Open serial comport
set fd [open COM1: r+]

# setup comport parameter
fconfigure $fd -blocking 0 -mode 9600,n,8,1 -translation binary -encoding binary

# read Barcode data
set data [read $fd]

# pass barcode data to a WebAccess const text tag.
SETVAL BarcodeText=$data

# close comport
close $fd
```
