

**Product:**

Multiprog; Adam-5510KW; Adam-5550KW

**Abstract:**

How to Delete an Existing Program in ADAM -5550KW or ADAM -5510KW

**Description:**

After downloading the program to PAC hardware, like ADAM-5550KW, how can I remove the program without downloading a new program?

**Solution:**

To clear the program in the memory of PAC hardware:

1. Make sure the connection from Multiprog to the PAC hardware is good.
2. Clicking the icon on the tap “Project Control Dialog”, as in figure 1, a window show. Click the dialog “Reset” and the program in the memory will be clear.
3. However, if the boot project is also included when downloading the program, then it should go through the “download” dialog and click the “delete on target”, as shown in figure 3, to clear to the program in the boot memory.
